## Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Notice of the Office communication was sent electronically on above-indicated "Notification Date" to the following e-mail address(es):

patents@hahnlaw.com akron-docket@hotmail.com

2) Notice of Draftsperson's Patent Drawing Review (PTO-948)

3) M Information Disclosure Statement(s) (PTO/SB/08)

Paper No(s)/Mail Date 3/27/2006.

Paper No(s)/Mail Date. \_\_\_

6) Other:

5) Notice of Informal Patent Application

## DETAILED ACTION

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims **1-3** are rejected under 35 U.S.C. 102(b) as being anticipated by Wolff et al. (WO 91/12779).

Wolff discloses a stent with a coating of a polymer carrier and a pharmaceutically active substance (fig. 1 and pg. 10 lines 38). The concentration of the substance is predetermined in the longitudinal direction such that the implant exhibits predetermined locally different elution characteristics in the longitudinal direction (pg. 11 lines 9-26). (Examiner is considering weaving non-drug eluting strands with drug eluting strands to be a variance in concentration of the drug along the longitudinal direction of the stent). The polymer carrier can be biodegradable and the degradation behavior of the polymer changes local elution characteristics (pg. 12 lines 16-22).

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Suba Ganesan whose telephone number is 571-272-3243. The examiner can normally be reached on M-F 8-5.

Application/Control Number: 10/562,376 Page 3

Art Unit: 3738

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Corrine McDermott can be reached on 571-272-4754. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
